

2016 in brief

OCI Solar Power sells Alamo 7 solar PV plant in Texas

This subsidiary monetized its investment in the 106.4 MW Alamo 7 solar PV plant with the sale of its 100% equity stake to Consolidated Edison Development for KRW 272.6 billion. Part of a 400 MW solar PV deal with San Antonio-based CPS Energy, the project itself was completed and began commercial operations in December.

OCI SE completes Saemangeum cogeneration plant in Korea

This subsidiary launched commercial operations of a cogeneration plant in the Saemangeum Industrial Complex on Korea's west-central coast. Built with the best available technologies for best-in-class efficiency and environmental performance, the KRW 557.6 billion facility has a nameplate capacity of 303 MW of power and 860 tons/hour of steam.

JANUARY

FEBRUARY

OCI completes 10.1 MW Hongze solar PV project in China

We wrapped up construction of a 10.1 MW solar project in Jiangsu Province. Consisting of a 6 MW distributed generation plant and a 4.1 MW utility plant, this unique hybrid facility is installed on ponds at a crab farm, demonstrating the potential of creative siting with land-intensive facilities such as aquaculture and water treatment.

OCI partners with Hyundai Oilbank on carbon black joint venture in Korea

We joined forces with Korean refiner Hyundai Oilbank to establish Hyundai OCI Carbon. When completed in 2018, the first phase of the planned 150,000 metric ton joint-venture plant will produce 100,000 metric tons of carbon black annually, raising our total production capacity in Korea from 270,000 to 370,000 metric tons.

OCI signs strategic alliance with Tokuyama Malaysia

We signed an agreement with Tokuyama of Japan to create a strategic alliance covering Tokuyama Malaysia's polysilicon operations. The alliance agreement included the purchase of a 16.5% equity stake in October as well as the option to acquire the remaining 83.5% stake at a later date. The agreement marks the beginning of our overseas expansion strategy for this business.

SEPTEMBER

Shandong OCI-Jianyang Carbon Black begins operations in China

This subsidiary began operations at an 80,000 metric ton carbon black plant in the city of Zaozhuang in Shandong Province. A joint venture with Zaozhuang Mining Group, the subsidiary will boost our global production capacity to 350,000 metric tons as it meets rising demand from major tire manufacturers located in the region.

OCTOBER

Ma Steel OCI Chemical begins operations in China

This subsidiary started operations at a 350,000 metric ton coal tar distillation plant in Anhui Province. A joint venture with Maanshan Iron & Steel Company, the subsidiary raises our global production capacity to 1,180,000 metric tons, positioning us for growth in this major manufacturing market.

OCI Listed on DJSI Korea for 8th Consecutive Year

We were named a component of the Dow Jones Sustainability Korea Index for 2016/2017, marking our 8th consecutive year on the index. Consisting of the top 45 of the 202 largest Korea-based companies ranked in terms of sustainability, the index is an important benchmark for global investment, evaluating corporate sustainability in terms of economic, environmental, and social performance.
