

# Social responsibility

OCI Museum of Art, Seoul, Korea

//We believe we have a unique opportunity and responsibility to make a difference in our local communities. In 2017, we invested over KRW 1.6 billion in community service and welfare, education and scholarships, and culture and the arts to do a world of good.//

### Engaging our communities

Our Angel campaign and volunteer organization has led our community service initiatives since 2006. The organization gives our employees and their families practical opportunities to donate their money, time, and talents to make a difference in local communities.

The Angel campaign encourages employees to donate a small portion of their paychecks to benefit worthy charities and those in need such as low-income households, the disabled, and the elderly. These donations raised KRW 156,553,007 in 2017 to which the company added matching funds based on the participation rate at each worksite.

Angel volunteers—both employees

and their families—also spent over 3,930 hours lending a helping hand during the year. They delivered rice to families in need. They helped serve meals to the needy and clean up trash. They sponsored math and English tutoring for middle-school students. They made and shared kimchi and delivered coal briquettes and heating oil to make winter a little warmer for the needy. They helped the disabled enjoy outings to local cultural attractions. They served as guide runners for the blind at two fun runs in the spring and fall. They helped athletes with disabilities participate in sporting events. They also continued to support Save the Children’s “Knit One, Save One” campaign to improve infant mortality in less-developed countries, knitting caps for infants in Tajikistan and Uganda.

### Inspiring interest in science

In 2011, we launched the Solar School project to donate and install 5 kW solar PV systems at a total of 300 primary schools across Korea. Beyond providing the practical benefit of meeting a portion of each school’s power needs, the project aims to teach students the principles and process of solar PV power generation to increase awareness of renewable energy and help inspire the next generation of creative engineers and scientists.

In 2017, we installed solar PV systems at a total of 20 primary schools on Jeju Island, bringing total installations on the island to 30 schools. We have now installed systems at 269 schools to date.

### Training the next generation

The Songam Foundation operates two scholarship programs to help worthy students pursue their educational dreams. In 2017, the Songam Foundation Scholarship presented awards to 36 middle school, 10 high school, and 84 university students selected for their outstanding academic performance. The Songam Multi-Cultural Family Scholarship separately presented awards to 11 university students from low-income, multi-cultural families during the year. Over 521 students have been supported since the scholarship’s inception in 2011.

Songdo Academy operates its namesake Songdo High School and Songdo Middle School, actively supporting each institution’s development to ensure they are fully

equipped to fulfill their mission of training the next generation.

### Bringing modern art to life

Opened in 2010, the OCI Museum of Art organizes and hosts exhibitions of established and up-and-coming Korean contemporary artists throughout the year. The museum operates two major programs—OCI Young Creatives and the OCI Residency Studio—to promote the arts. The OCI Young Creatives program launched in 2010 helps rising artists reach a wider audience, awarding grants of KRW 10 million and the opportunity for a solo exhibition at the museum. The OCI Residency Studio program launched in 2011 runs from April to the following March, providing studio and living space to eight talented

artists each year. Since 2014, the museum has also run OCI Residency 1211, an international artist-in-residence exchange program. For more information on the museum and exhibitions, please visit [OCIMuseum.org](http://OCIMuseum.org).
